

std::exception

```
classDiagram
    class std_exception["std::exception"]
    class GenericCamera_disconnected_exception["GenericCamera::disconnected_exception"]
    GenericCamera_disconnected_exception --|> std_exception
```

The diagram illustrates an inheritance relationship. At the top is a white rectangular box with a thin black border containing the text 'std::exception'. Below it is a gray rectangular box with a thick black border containing the text 'GenericCamera::disconnected_exception' on two lines. A solid blue arrow points vertically from the top center of the gray box to the bottom center of the white box, indicating that 'GenericCamera::disconnected_exception' inherits from 'std::exception'.

GenericCamera::disconnected
_exception
