

`std::true_type`

The diagram illustrates an inheritance relationship. At the bottom is a gray rectangular box representing the base class `nlohmann::detail::is_complete_type`. It is divided into three horizontal sections: the top section contains the class name and template parameters, while the two bottom sections are empty. A blue arrow points upwards from the top section of this box to the bottom section of a white rectangular box above it. This white box represents the derived class `std::true_type` and is also divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty.

`nlohmann::detail::is
_complete_type< T, decltype
(void(sizeof(T)))>`
