

true_type

```
graph BT; A[nlohmann::detail::is_basic_json< NLOHMANN_BASIC_JSON_TPL >] --> B[true_type];
```

The diagram illustrates an inheritance relationship. At the bottom is a large gray rectangle representing the base class `nlohmann::detail::is_basic_json< NLOHMANN_BASIC_JSON_TPL >`. It is divided into three horizontal sections, with the top section containing the class name. A blue arrow points upwards from the top center of this gray rectangle to the bottom center of a smaller white rectangle above it. The white rectangle represents the derived class `true_type` and is also divided into three horizontal sections, with the top section containing the class name.
