

true\_type

```
graph BT; A[nlohmann::detail::is_basic_json< NLOHMANN_BASIC_JSON_TPL >] --> B[true_type];
```

The diagram illustrates an inheritance relationship. At the bottom is a large gray box representing the base class `nlohmann::detail::is_basic_json< NLOHMANN_BASIC_JSON_TPL >`. It has three horizontal sections, with the top one containing the code. Above it is a smaller white box representing the derived class `true_type`, also with three horizontal sections. A blue arrow points from the top of the gray box to the bottom of the white box, indicating that `true_type` inherits from the base class.

nlohmann::detail::is  
\_basic\_json< NLOHMANN  
\_BASIC\_JSON\_TPL >
