

false_type

```
classDiagram
    class nlohmann_detail_is_complete_type["nlohmann::detail::is_complete_type< T, typename >"]
    class false_type
    nlohmann_detail_is_complete_type --|> false_type
```

The diagram illustrates a class hierarchy. At the bottom is a class box for `nlohmann::detail::is_complete_type< T, typename >`, which is divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. Above this box is another class box for `false_type`, also divided into three horizontal sections, with the class name in the top section and empty sections below. A blue arrow with an open triangular head points from the top section of the bottom box to the bottom section of the top box, indicating that `false_type` inherits from `nlohmann::detail::is_complete_type< T, typename >`.

nlohmann::detail::is
_complete_type< T, typename >
